Abstract of JP63313544

PURPOSE: To readily obtain a snack in a different form, by preparing plural sheets of starchy dough having different expanding power using plural kinds of starchy raw material, superposing the sheets, forming the superposed sheets into a given shape and roasting the formed sheets.

CONSTITUTION: Kinds, blending ratio, degree of gelatinization of a starchy raw material, such as rice, wheat or barley, corn, potato or sweet potato, thickness of sheets, etc., are adjusted to prepare plural starchy dough sheets 1 having great expanding power and starchy dough sheets 2 having small expanding power. The resultant starchy dough sheets 1 and 2 are then superposed and punched or cut to a given shape in the superposed state and formed. The formed dough is subsequently roasted by frying in oil, etc., to afford the aimed snack.
